

# Mental Moves

## Develop

### **1. Gather Information**

What has already been done? What evidence is available?

### **2. Ask Questions**

What else do I want to know?

### **3. Qualify**

What are the gray areas? Where are the ambiguities?

### **4. Make Connections**

How does this topic relate to other internal or external ideas or works?

### **5. Organize and Discuss**

How will these pieces fit together into a meaningful presentation?
